

Mandatory Requirements for Onsite Contractors providing Services and Consultants

Work safety is a top priority at Schwan's. That focus includes employees as well as all on-site contractors and service providers entering our properties. To manage and simplify the complex compliance and documentation, we have engaged a third party to assist. All suppliers performing service work, consultants, and those picking up waste and recycling at any of our facilities are required to register in BROWZ – an online compliance and contract management service.

Through BROWZ: suppliers can view Schwan's requirements for doing business, submit qualification documents, review status of compliance, sign and submit required paperwork.

There is a fee for registering in BROWZ - however if a supplier is already in the BROWZ system that fee will be reduced.
